DETAILED ACTION

1. Applicant's arguments, see pages 16-20, filed 6/22/2006, with respect to claims 1,15,29,43,45,50,55 have been fully considered and are persuasive. The 103(a) rejection of claims 1,15,29,43,45,50,55 has been withdrawn.

Allowable Subject Matter

2. Claims 1-59 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Independent Claims 1,15,29,43 are allowable over the prior art of record since the cited references taken alone or in combination do not teach or suggest: *a gm switch coupled to the first output of the variable gain amplifier circuit and providing an output having only a first polarity, wherein the second output of the variable gain amplifier circuit and the output of the gm switch are combined to provide a corrected signal.*

Independent Claims 45,50,55 are allowable over the prior art of record since the cited references taken alone or in combination do not teach or suggest: *switching means coupled to the first variable gain output and providing an output having only a first polarity, wherein the second variable gain output and the output of the switch means are combined to provide a corrected signal.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Goh et al. (US 6,519,106); Callahan Jr. (US 6,747,515); Briskin et al. (US 6,721,117) ;
